

REFLECTION QUESTIONS for the EGTAT PARTICIPANT

Complete this section *after* your class has been observed but *before* you have met with your observer.

1. What did you feel went well in this class session?

The class interacted more than usual, which was good. I am going to attribute this to growing interaction between students/teacher. The more I interact with them then the better the relationship of student/teacher becomes and the students will be more willing to ask questions. I think this is just a natural progression of a class, but since this is my first semester teaching I am unsure as to whether or not this is the case.

2. What would you like to change about this class session if you had to teach it again?

Time management, I normally have enough time to go through the problem worksheet but I didn't even have enough time to pass it out and let the students start it. I would have cut down on explaining so much so I could get the worksheet passed out to evaluate their knowledge.

3. What have you found useful/not so useful about the observation process?

Useful: its going to give me feedback from a different perspective.

Not useful: not sure, it seems like feedback can never be a bad thing.
