

Question	Response
Comment on strengths and weaknesses of the instructor	Robert was a great instructor. He was always able to help me.
Comment on strengths and weaknesses of the course	This course should not be taught during the summer. It is a very difficult course to start with and if you ever get behind, you wont be able to catch up.
-----	-----
Comment on strengths and weaknesses of the instructor	Robert is very knowledgeable, relatable, and receptive to student questions. I appreciated his willingness to explain complex concepts despite his mastery of the material.
Other comments	I am a very visual learner. I would have benefitted from more visualizations of graphical concepts. I understand the value of not relying on PowerPoint-based lectures, but at times I struggled with grasping graphical concepts based solely on written instruction.
